

# Save MMJ In Tacoma!

We the undersigned support safe access for patients to medical Cannabis in the city of Tacoma. Patients need and deserve safe access to medicine, and recreational stores will not meet the needs of patients. Under 69.51a our medical Cannabis law in this state says that any patient who has been authorized by a qualified doctor, naturopath or nurse-practitioner can collectively grow and share medicine with other patients.

We urge the council to create a committee of collective operators and council members to come up with a working, viable solution to the councils concerns. Issues to be decided on include developing regulations or a licensing strategy for MMJ within the city of Tacoma, and a potential tax ordinance for collectives within the city. Access points are willing to pay a licensing fee and reasonable taxes, as long as the rights of patients to access medicine at a safe and affordable cost.

List of needs for patients need access to:

- Access points within their neighborhood or immediate area.
- Access to information about the medical use of Cannabis, which is forbidden under state law in 502.
- Access to affordable medicine.
- Access to specific medical strains, including options high in CBD and low in psychoactive THC.
- Access to concentrates made from medicinal strains to be used in treatment of Cancers and other serious medical conditions.
- Access to infused products including tinctures, edibles, sublingual and transdermal methods of ingesting medication.

Recreational 502 stores do not meet the needs of patients. A total of five recreational stores cannot and will not ever be able to provide the medicinal strains or products that are needed, even when they are running at full capacity, which is estimated to be 12-18 months from happening.

Reasons that 502 stores cannot help patients:

- I-502 recreational retailers are forbidden from mentioning any therapeutic or medicinal benefits of Cannabis, leaving buyers and patients alike without any information regarding the use of products.
- The recreational market has zero demand for high CBD and low THC products, meaning the essential medications for patients are not available for purchase.
- The recreational market has zero access to tinctures, medicinal concentrates, sublingual products, transdermal products or a vast majority of edibles due to emergency rules imposed by the Liquor Control Board.
- Excessive taxation puts basic patient needs like Cannabis flower/bud at two to three times the current price offered by collectives, rendering it unaffordable to most patients.
- Excessive taxation and a lack of information in 502 retail stores is feeding demand to the black market, which is not a safe option for the sick and dying patients of Tacoma.

We urge the council to consider the needs of patients and show the type of compassion and empathy that created our medical Cannabis law in 1998. The 502 system is not intended to help patients. It is designed to actively discriminate against patients or users seeking therapeutic or medicinal information and Cannabis. Please allow patients to continue to have safe access, and respect the needs of those most vulnerable in our city.

# Save MMJ In Tacoma!

We the undersigned support safe access for patients to medical Cannabis in the city of Tacoma. Patients need and deserve safe access to medicine, and recreational stores will not meet the needs of patients. Under 69.51a our medical Cannabis law in this state says that any patient who has been authorized by a qualified doctor, naturopath or nurse-practitioner can collectively grow and share medicine with other patients.

We urge the council to create a committee of collective operators and council members to come up with a working, viable solution to the councils concerns. Issues to be decided on include developing regulations or a licensing strategy for MMJ within the city of Tacoma, and a potential tax ordinance for collectives within the city. Access points are willing to pay a licensing fee and reasonable taxes, as long as the rights of patients to access medicine at a safe and affordable cost.

List of needs for patients need access to:

- Access points within their neighborhood or immediate area.
- Access to information about the medical use of Cannabis, which is forbidden under state law in 502.
- Access to affordable medicine.
- Access to specific medical strains, including options high in CBD and low in psychoactive THC.
- Access to concentrates made from medicinal strains to be used in treatment of Cancers and other serious medical conditions.
- Access to infused products including tinctures, edibles, sublingual and transdermal methods of ingesting medication.

Recreational 502 stores do not meet the needs of patients. A total of five recreational stores cannot and will not ever be able to provide the medicinal strains or products that are needed, even when they are running at full capacity, which is estimated to be 12-18 months from happening.

Reasons that 502 stores cannot help patients:

- I-502 recreational retailers are forbidden from mentioning any therapeutic or medicinal benefits of Cannabis, leaving buyers and patients alike without any information regarding the use of products.
- The recreational market has zero demand for high CBD and low THC products, meaning the essential medications for patients are not available for purchase.
- The recreational market has zero access to tinctures, medicinal concentrates, sublingual products, transdermal products or a vast majority of edibles due to emergency rules imposed by the Liquor Control Board.
- Excessive taxation puts basic patient needs like Cannabis flower/bud at two to three times the current price offered by collectives, rendering it unaffordable to most patients.
- Excessive taxation and a lack of information in 502 retail stores is feeding demand to the black market, which is not a safe option for the sick and dying patients of Tacoma.

We urge the council to consider the needs of patients and show the type of compassion and empathy that created our medical Cannabis law in 1998. The 502 system is not intended to help patients. It is designed to actively discriminate against patients or users seeking therapeutic or medicinal information and Cannabis. Please allow patients to continue to have safe access, and respect the needs of those most vulnerable in our city.
