

# CITY OF TACOMA, WASHINGTON OFFICE OF THE CITY COUNCIL COUNCIL CONSIDERATION REQUEST

**TO:** Mayor & City Council  
**FROM:** Council Member John Hines and Christina Caan, Policy Analyst  
**COPIES TO:** Elizabeth Pauli, City Manager; Chris Bacha, City Attorney  
**SUBJECT:** **Ordinance to amend Title 17 and Title 5 of the Municipal Code to better address animal overpopulation and add clarifications**  
**DATE:** April 30, 2025

---

**We ask for your support to advance an ordinance amending Title 17 and Title 5 of the Municipal Code to better address animal overpopulation and add clarifications.**

## LEGISLATIVE INTENT

**Ordinance Request:** Tacoma is grappling with an increase in its animal population, leading to overburdened animal shelters, strained animal control and police services, and amplified risks to the environment, public safety, and public health. Animal overpopulation is also detrimental for animal welfare, as it can lead to increased euthanasia rates for healthy and adoptable animals due to the high costs of sheltering and an insufficient number of adopters or foster homes.<sup>1</sup>

- In 2022-2023, Tacoma's 311 system received 758 complaints related to animal issues, such as breeding, animal waste, and animals that have been hit by vehicles. In 2023-2024, the number of complaints doubled. Data for 2024-2025 shows that 311 complaints for animal issues remained on par with the record highs at 1,467 complaints.
- The Humane Society for Tacoma & Pierce County (HSTPC) has resorted to doubling and tripling kennel occupancy, as well as waiving or reducing adoption fees, on multiple occasions due to high intake rates and overcrowding.<sup>2</sup>

Tacoma's Municipal Code (TMC) is currently ill-suited to help curb animal overpopulation, as it lacks robust constraints on issues such as breeding companion animals for profit and owning unaltered animals. The TMC also lacks sufficient fees to help generate even modest amounts of revenue that could be used to support low-cost spay and neuter programs, as well as Trap-Neuter-Return (TNR) efforts for community cats. Low-cost spay and neuter programs, along with TNR efforts, are a proven method for managing animal populations, limiting the burden on Animal Control, Police officers, and animal shelters, minimizing the negative impacts of large numbers of unhoused animals on neighborhoods, and curbing the need to euthanize healthy and adoptable companion animals.<sup>3</sup>

To better equip Tacoma to manage its animal population, we are proposing a variety of updates to Title 17 of the TMC, such as:

---

<sup>1</sup> [Shelter Intake and Surrender | Animal Homelessness | ASPCA](#)

<sup>2</sup> [Making Happy Happen: Over 220 Animals Find Loving Homes During Shelter Capacity Crisis - The Humane Society for Tacoma & Pierce County](#)

<sup>3</sup> [Dog Population & Dog Sheltering Trends in the United States of America - PMC \(nih.gov\)](#)

- Adding a definition for “community cats” to enable unowned, free-roaming, and generally feral cats that may be receiving care from a community member or may be stable without intervention in their resident area to remain outdoors and be altered through TNR programs.
- Banning the breeding, advertising, and sale of companion animals for profit without a current business license issued under TMC 6B.20.
- Creating mandatory spay and neuter requirements for animals impounded by Animal Control, absent proof of alteration or risk to the health of the animal.
- Increasing the animal licensing fees, including unaltered fees, to help fund low-cost spay and neuter programs and TNR efforts.

Along with updates aimed at curbing animal overpopulation, we are proposing changes to the legal status of indoor and outdoor pigs in Title 17 and Title 5 to better assist Animal Control and the Tacoma Police Department when dealing with these animals. While “hogs” are currently regulated in Title 5, the code lacks clarity regarding the definition of “hogs” and pigs that fall outside the definition of a “hog” are not regulated. We are proposing code changes that clarify the definition of “hogs” and the conditions for keeping pigs that are not raised for slaughter outdoors, as well as new code for keeping indoor companion pigs. These changes are in alignment with other large cities in Washington that allow pet pigs, such as Seattle, Olympia, Vancouver, Bellevue, and Everett, and Department of Ecology guidance that pigs do not need to be precluded from properties within the Tacoma Smelter Plume area due to potentially contaminated soils.

DESIRED FIRST READING OF ORDINANCE DATE: May 13, 2025

**COMMUNITY ENGAGEMENT**

Community members in Tacoma have expressed alarm regarding the number of unhoused animals in their neighborhoods and difficulties finding space or long wait times for assistance at animal shelters. In addition, community members express frustration that overpopulation is a drain on animal control and police services and share concerns about sanitation issues from unhoused animals. City Council Members have also received community input regarding problems arising from a lack of clarity in the code regarding hogs. The HSTPC and other local community groups have also shared feedback regarding the challenges they face with animal overpopulation.

**2025 STRATEGIC PRIORITIES**

**Equity and Accessibility:** These proposed updates aim to better enable the City to provide animal welfare services to all our residents by decreasing animal overpopulation. This proposal also aims to allow those who qualify for the Tacoma Public Utility Bill Assistance program to pay reduced rate animal license fees, along with seniors and individuals with a permanent disability. This aims to help make pet ownership more affordable for all our low-income residents.

**Civic Engagement:** *Equity Index Score:* Moderate Opportunity  
 Increase the percentage of residents who believe they are able to have a positive impact on the community and express trust in the public institutions in Tacoma.

**Livability:** *Equity Index Score:* Moderate Opportunity  
 Increase positive public perception of safety and overall quality of life.

**ALTERNATIVES**
