

PROTECT TACOMA'S TIDEFLATS

Talking Points for the Tideflats Interim Regulations Public Hearing on October 23

WHAT Public Hearing on Tideflats Interim Regulations at Tacoma City Council (#TacCouncil)

WHEN Tuesday, October 23, 2018, 5:00PM (sign-up starts at 4:30PM)

WHERE Rialto Theater (310 South 9th Street, Tacoma, WA 98402)

BACKGROUND

The City of Tacoma, with its partners the Puyallup Tribe and the Port of Tacoma, are working on a Subarea Plan for Tacoma's Tideflats, which will establish rules for strategic capital investments and environmental review in our city's manufacturing/industrial center. On November 21, 2017, in part because of environmental advocates like you, City Council passed interim regulations **pausing new fossil fuel development** during the Tideflats Subarea Planning Process. However, interim regulations must be renewed every six months and we need your help to tell the Tacoma City Council why we need to **renew and strengthen** interim regulations until the Subarea Plan is complete.

TALKING POINTS

- ★ **I am commenting in solidarity with the Protect Tacoma's Tideflats Coalition.**
- ★ **Thank you for pausing new fossil fuel infrastructure through interim regulations.** Fossil fuels threaten our health, our waterways, and our economy. I support protecting the economy, environment, and public health while we work out a long-term solution through the Subarea Planning Process.
- ★ **Interim regulations expire in November. They must be renewed now and throughout the duration of the Subarea Planning Process.** The need for these interim regulations to maintain the status quo until the Subarea Plan is complete remains the same today as when they were passed.
- ★ **Interim regulations should be strengthened to include limits on the expansion of existing fossil fuel infrastructure, as originally recommended by the Planning Commission.** I support requiring an additional review process for any existing fossil fuel projects seeking expansion. This type of review is common and ensures that companies can invest in a cleaner future and that there is a transparent process for considering new development while we work out the long-term vision for the Tideflats.

TIPS FOR PUBLIC COMMENT

- ★ Introduce yourself and the personal stake you have in this issue. [e.g. *Are you a Tacoma resident concerned about health impacts? A local business owner? A paddler or recreationist? Let's show our diversity of perspectives!*]
- ★ Thank the City Council for their work.
- ★ Write your comment in advance and practice with a timer.
- ★ Comments are usually limited to three minutes, but be prepared for Tacoma City Council to shorten the time limit to two minutes. If your comment is longer, choose just a few of these points to shorten it.

—————→ **Pre-Hearing Huddle, 4PM at The Bostwick (764 Broadway, Tacoma) to finalize your comments and get ready for the night.**

Can't attend or don't wish to speak? Please submit comments to cityclerk@cityoftacoma.org by 1pm on the 23rd.

PROTECT TACOMA'S TIDEFLATS

Tideflats Interim Regulations Public Hearing on October 23

We, the undersigned, in solidarity with the Protect's Tacoma's Tideflats Coalition, believe Tacoma should move away from fossil fuels and toward a thriving port committed to renewable energy and green jobs. We support the renewal of interim regulations for the Tideflats now and throughout the duration of the Subarea Planning Process. Interim regulations should be strengthened to include limits on the expansion of existing fossil fuel infrastructure, as originally recommended by the Planning Commission. We support requiring an additional review process for any existing fossil fuel projects seeking expansion.

WHAT Public Hearing on Tideflats Interim Regulations at Tacoma City Council (#TacCouncil)

WHEN Tuesday, October 23, 2018, 5:00PM (sign-up starts at 4:30PM)

WHERE Rialto Theater (310 South 9th Street, Tacoma, WA 98402)

BACKGROUND

The City of Tacoma, with its partners the Puyallup Tribe and the Port of Tacoma, are working on a Subarea Plan for Tacoma's Tideflats, which will establish rules for strategic capital investments and environmental review in our city's manufacturing/industrial center. On November 21, 2017, in part because of environmental advocates like you, City Council passed interim regulations **pausing new fossil fuel development** during the Tideflats Subarea Planning Process. However, interim regulations must be renewed every six months and we need your help to tell the Tacoma City Council why we need to **renew and strengthen** interim regulations until the Subarea Plan is complete.

TALKING POINTS

- ★ **I am commenting in solidarity with the Protect Tacoma's Tideflats Coalition.**
- ★ **Thank you for pausing new fossil fuel infrastructure through interim regulations.** Fossil fuels threaten our health, our waterways, and our economy. I support protecting the economy, environment, and public health while we work out a long-term solution through the Subarea Planning Process.
- ★ **Interim regulations expire in November. They must be renewed now and throughout the duration of the Subarea Planning Process.** The need for these interim regulations to maintain the status quo until the Subarea Plan is complete remains the same today as when they were passed.
- ★ **Interim regulations should be strengthened to include limits on the expansion of existing fossil fuel infrastructure, as originally recommended by the Planning Commission.** I support requiring an additional review process for any existing fossil fuel projects seeking expansion. This type of review is common and ensures that companies can invest in a cleaner future and that there is a transparent process for considering new development while we work out the long-term vision for the Tideflats.

TIPS FOR PUBLIC COMMENT

- ★ Introduce yourself and the personal stake you have in this issue. *[e.g. Are you a Tacoma resident concerned about health impacts? A local business owner? A paddler or recreationist? Let's show our diversity of perspectives!]*
- ★ Thank the City Council for their work.
- ★ Write your comment in advance and practice with a timer.
- ★ Comments are usually limited to three minutes, but be prepared for Tacoma City Council to shorten the time limit to two minutes. If your comment is longer, choose just a few of these points to shorten it.

—————→ **Pre-Hearing Huddle, 4PM at The Bostwick (764 Broadway, Tacoma) to finalize your comments and get ready for the night.**

Can't attend or don't wish to speak? Please submit comments to cityclerk@cityoftacoma.org by 1pm on the 23rd.

Email Kenny Coble (kcoble@healthybay.org) to RSVP and stay up-to-date as things progress.

PROTECT TACOMA'S TIDEFLATS

Tideflats Interim Regulations Public Hearing on October 23

We, the undersigned, in solidarity with the Protect's Tacoma's Tideflats Coalition, believe Tacoma should move away from fossil fuels and toward a thriving port committed to renewable energy and green jobs. We support the renewal of interim regulations for the Tideflats now and throughout the duration of the Subarea Planning Process. Interim regulations should be strengthened to include limits on the expansion of existing fossil fuel infrastructure, as originally recommended by the Planning Commission. We support requiring an additional review process for any existing fossil fuel projects seeking expansion.
