

SCHUSTER STADIUM HILLSIDE PETITION 2013

To: Mayor Strickland, City Manager Broadnax, Economic Development Director Noguero and City Council representatives:

We, the undersigned residents of the Stadium District and surrounding areas, are requesting immediate removal of the newly planted trees along Stadium Way. The Stadium Way road project has been completed in a very user friendly and beautiful fashion.

Tacoma's Urban Forestry Policy protects the scenic views from Stadium Way. There is an ongoing committee, working with the City of Tacoma to eradicate the existing invasive species that are growing on the hillside and are already blocking the scenic views from the public. The newly planted trees will further compound the view problem. If these trees are removed immediately, they can be relocated to areas where they can grow to their maximum size and not interfere with the wonderful views Tacoma has to offer visitors, commuters and residents.

Thank you.

This unexpected situation has been brought to Kurtis Kingsolver's attention in a phone conversation. He has expressed his concern and intention to help solve the problem. We would be very pleased to know that we also have your support to help us make this a small issue, easily corrected. Rather than flood you with petition names, each of these signers represents a group or association of many Stadium Way residents.

**Thank You.
