PREFACE

Section 35.77.010 of the Revised Code of Washington (RCW) provides that each city shall annually update its Six-Year Comprehensive Transportation Program and file a copy of the adopted Program with the Secretary of the Washington State Department of Transportation (WSDOT) by July 1 of each year. The Program is NECESSARY TO ALLOW CITIES AND COUNTIES TO OBTAIN STATE AND FEDERAL FUNDING. For a project to obtain funding from the state, it must appear in the agency's current program. Since the state also disperses federal highway funds, this requirement applies to federally-funded projects as well.

The City will adopt this program concurrently with the Capital Facilities Program as part of a City Budget review process. The City will present to the State the annually adopted Six-Year Comprehensive Transportation Program each year.

In 1995 RCW 35.77.010 was amended by Senate House Bill 1928. This amendment revised the name from the Six-Year Comprehensive Street Program to the Six-Year Comprehensive Transportation Program. It also requires each city to specifically set forth those projects and programs of regional significance for inclusion in the transportation improvement program within that region.

The program is based upon anticipated revenues versus desirable projects. There are always more

projects than available revenues. Therefore, the primary objective of the program is to integrate the two to produce a comprehensive, realistic program for the orderly development and maintenance of our arterial street system.

Several important points must be considered during the review of the proposed Program. The early years of the Program are more defined. Projects in the later years are more flexible and may be accelerated, delayed or canceled as funding and circumstances change.

It is also important to note that the adoption of the program does not irreversibly commit the City of Tacoma to construct the projects. A project may be canceled at any time during the course of study or design. The usual reasons for canceling a project are that it is environmentally unacceptable or contrary to the best interests of the community as a whole. The program may at any time be revised by a majority of the City Council, but only after a public hearing.

The City of Tacoma strives to create a transportation system that achieves the following goals:

- promote active transportation and vehicle safety;
- work toward complete streets – enabling safe and convenient access and travel for all users (pedestrians, bicyclists, transit riders, and people of all ages and abilities, as well as freight and motor vehicle drivers) and to foster a sense of place in the public realm;
- serve and support economic development; and
- be representative of all neighborhoods;

STRATEGY

To achieve the goals and outcomes of the program, the City applies the following strategies:

- Leverage available funding through grant requests and coordination with other agencies;
- Leverage funded projects to support unfunded projects;
- Leverage projects that have a positive impact on economic development;
- Create partnerships;
- Implement best management practices;
- Address equity throughout the City;
- Apply project management principles so that the process is well-defined and progress is adequately tracked;
- Collaborate with regional funding partners to align priorities with funding opportunities; and
- Assign priority to projects based on the Project Selection Criteria.

PROJECT SELECTION CRITERIA

The evaluation system is designed to provide guidance in evaluating projects and determining their feasibility and applicability in the 6 Year Comprehensive Transportation Program. This plan assigns priority to projects that:

- Prioritize the movement of people and goods via modes that have the least environmental impact and greatest contribution to livability in order to build a balanced transportation network that provides mobility option, accessibility, equity, and economic vitality for all;
- Protect natural, as well as neighborhood, assets to create and connect places where people can live, work, and play in a safe and healthy environment;
- Design an environmentally and fiscally sustainable transportation system that serves its users through strategic planning efforts, funding, and projects;

The 6 Year Comprehensive Transportation Program goal and strategies are consistent with the direction of the City's Comprehensive Plan.

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The State's Growth Management Act (GMA) required local governments to develop and adopt Comprehensive Plans covering land use, housing, capital-facilities, utilities, and transportation by July 1, 1993. Tacoma adopted its first Comprehensive Plan in 1992. The plan is regularly updated.

Specific requirements in the GMA regarding the transportation element include: making land-use assumptions, establishing level-of-service standards, estimate traffic impacts, inventorying existing facilities and services needs, analyzing financial capability, intergovernmental coordination efforts, demand management strategies, and a pedestrian and bicycle component.

The Comprehensive Plan is the official statement adopted by the City Council setting forth goals and policies to protect the health, welfare, safety, and quality of life of Tacoma's residents. The Comprehensive Plan anticipates change for the coming 20 years and establishes direction for the future physical growth, development and improvement of the city. The plan also fulfills the City's responsibilities to manage growth as mandated by State law.

The requirements of the GMA imply that the projects in the Six-Year Comprehensive Transportation Program be consistent with and implement the goals, policies and plan recommendations of the Comprehensive Plan.

GRANT APPLICATIONS AND LEVERAGING LOCAL DOLLARS

The need to leverage local dollars through grant applications is very important to all program managers and consistent with the direction set forth in Tacoma's Strategic Plan. All sections have more needs than available local dollars. Therefore, this Program and its configuration by sections, allows program managers to aggressively submit state and federal grant applications and pursue private partnerships thereby leveraging Tacoma's local dollars.
