

**CITY OF TACOMA, WASHINGTON  
OFFICE OF THE CITY COUNCIL  
COUNCIL CONSIDERATION REQUEST**

**TO:** Mayor & City Council  
**FROM:** Council Member Olgy Diaz and Senior Council Policy Analyst Lynda Foster  
**COPIES TO:** Elizabeth Pauli, City Manager; Kurtis Kingsolver, Deputy City Manager; Hyun Kim, Deputy City Manager; Bill Fosbre, City Attorney  
**SUBJECT:** **Resolution – Contingency fund request for \$10,000 to support the purchase of a truck for the Tacoma Tree Foundation – September 19, 2023**  
**DATE:** September 13, 2023

---

**I ask for your support for a Council Contingency Fund expenditure of \$10,000 to assist the Tacoma Tree Foundation to purchase a truck for the purposes of tree planting and maintenance in the City of Tacoma.**

**LEGISLATIVE INTENT:**

**Council Contingency Fund Request:**

The Tacoma Tree Foundation has launched a campaign to raise \$25,000 to purchase a truck. This resolution would provide \$10,000 from Council Contingency Funds for this campaign.

This contingency fund allocation invests long-term in our tree canopy. Over the past five years, the Tacoma Tree Foundation has distributed 10,000 young trees by borrowing vehicles from their partners and using their personal cars. Their goal, pending availability and affordability, is to purchase a hybrid or electric flatbed truck. This would be used along with other infrastructure. They will need a water trailer to water trees, safety equipment to keep trees and neighbors safe, and to plan for insurance and maintenance costs to keep trucking trees for at least another five years. Once planted, from June to October, trees need 15-20 gallons of water a week, and their growth and health must be monitored year-round. This infrastructure will support the work of tree planting and ongoing tree maintenance.

While staff estimate that a hybrid small pickup truck traveling 5000 miles a year in town would emit approximately 1 metric ton of greenhouse gases a year, this greenhouse emissions is offset by the work of the Tacoma Tree Foundation. During one year, a mature tree will absorb more than 48 pounds of carbon dioxide from the atmosphere and release oxygen in exchange<sup>1</sup>. Last year, the Tacoma Tree Foundation planted over 2200 trees in the Tacoma area across all their programs.

**Background on the City's current funding of the Tacoma Tree Foundation:**

In an effort to improve equitable, community-focused urban forestry outcomes, City Council passed ongoing funding for a Community Tree Program in 2022. Following the budget adoption, the City of Tacoma solicited proposals for a partnership program between the City's Urban Forestry Program and a local nonprofit. The goal of this Program is to enhance community engagement, education,

---

<sup>1</sup> [original source: European Environment Agency](#)

growth, and stewardship of Tacoma's urban forest by reducing barriers and expanding programming to underserved and overburdened neighborhoods throughout Tacoma. Through a competitive bidding process, the Tacoma Tree Foundation was awarded the contract of \$75,000 per year for the Community Tree Program. Additionally, the Tacoma Tree Foundation receives \$25,000 annual to run the Tacoma Climate Leadership Cohort program and received \$60,000 from Tacoma Creates for arts and education programs.

FUNDING REQUESTED:  
\$ 10,000

DESIRED RESOLUTION DATE: September 26, 2023

**COMMUNITY ENGAGEMENT/ (CUSTOMER RESEARCH):**

The City of Tacoma created the 2030 Tacoma Climate Action Plan (CAP). Creation of this plan centered frontline communities' priorities, and Tacoma's new plan invests in both climate action and environmental justice. As we plan for our collective climate future, the City of Tacoma needs to hear continually from communities that are historically underrepresented, underserved, made vulnerable communities, or expected to experience the first or worst impacts of climate change. CAP includes a number of actions related to tree planting and maintenance, which would be supported with this funding request. The City also utilizes the Urban Forest Management Plan, which was adopted by Council Resolution December 2019 to support our goal of a healthy, thriving, equitable tree canopy throughout all of Tacoma, which a specific emphasis on community engagement, facilitating relationships with local partners, and environmental justice. This was the foundational policy that led to the Council passing funding for the Community Tree Program.

**2025 STRATEGIC PRIORITIES:**

**Equity and Accessibility:**

Tree canopy coverage is critical to reducing the urban heat island effect. In addition to Tacoma's Tree Canopy being disproportionately low in the Puget Sound Region, the analysis further recognizes that within the City of Tacoma, tree canopy is not distributed evenly, with some census blocks experiencing as low as 3% tree canopy cover, while others have as high as 64%. In Tacoma, our analysis found that urban heat islands increase maximum temperatures by as much as 6.2 degrees F above the local baseline. Combined with regional climatic effects, neighborhoods in Central and South Tacoma may be as much as 14 degrees F hotter than neighborhoods in North Tacoma. 11,980 people live in neighborhoods where maximum temperature exceed the 90th percentile and where average per capita incomes are less than 200% the federal poverty level. Every additional degree carries significant public health costs.

**Livability: Equity Index Score:** Select Index Score.

Improve access and proximity by residents to diverse income levels and race/ethnicity to community facilities, services, infrastructure, and employment.

Improve health outcomes and reduce disparities, in alignment with the community health needs assessment and CHIP, for all Tacoma residents

Increase positive public perception of safety and overall quality of life.

How does your policy, program, or service help or harm the health of the natural environment?<sup>2</sup> (e.g. reduction in carbon emissions, open space conditions, sustainability, clean air, water and soil, and noise and light pollution).

Explain how your legislation will affect the selected indicator(s)?

The Community Tree Program uses the City's Equity Index to direct resources into the lowest opportunity neighborhoods, many of which have less than half the tree canopy coverage of higher

opportunity neighborhoods. In this way, the Community Tree Program has begun delivering upon the City’s goals around climate resiliency and equity. The Tacoma Tree Foundation’s goal is to grow a fair urban forest, one where residents of historically underserved neighborhoods have access to clean air, a cool shade, health and wellbeing, and where toxic stormwater runoff does not pollute our watershed. To make this possible, they need to do more than plant thousands more trees—they must also care for them year-round. This truck is critical infrastructure to accomplish this goal and an investment in the health and future of neighborhoods with low [tree equity](#).

**ALTERNATIVES:**

Alternative	Positive Impacts	Negative Impacts
1. Provide less or no funding.	Preserve Council resources for other priorities.	Do not support critical infrastructure investments in supporting our tree canopy.
2. Provide more funding.	Increase Tacoma Tree Foundation’s capacity to purchase infrastructure to plant and maintain trees.	Reduce Council resources for other priorities, and does not acknowledge there is community support to fund this campaign.

**EVALUATIONS AND FOLLOW UP:**

The Tacoma Tree Foundation provides annual reports for the Tacoma Tree Program, which will highlight the work this truck is used for.

**SPONSOR RECOMMENDATION:**

Sponsors recommend passing this contingency fund request in order to support work to boost our tree canopy across the City.

**FISCAL IMPACT:**

This request would allocate \$10,000 in contingency funds.

**If you have a question related to the Council Contingency Fund Request, please contact Lynda Foster at 253.591.5166 or [lfoster@cityoftacoma.org](mailto:lfoster@cityoftacoma.org).**
