

October 20, 2021

INFRASTRUCTURE, PLANNING AND SUSTAINABILITY COMMITTEE

On behalf of the Board of Building Appeals I am pleased to forward our recommendation to adopt an amendment in the City's Tacoma Municipal Code – Title 2.02 Building Code related to compliance with the FEMA National Floodplain Insurance Program (NFIP) model ordinance requirements. These amendments will incorporate code provisions for restricting construction or reconstruction of residential structures or the installation of water wells within floodways in the city.

The Board of Building Appeals met on October 20, 2021 to review the code section proposed by City staff, and the Board voted in favor of adopting this new code provision.

Sincerely,

Rory Connally, AIA, Chairman  
Board of Building Appeals

cc. Board of Building Appeals
